EDUCATION

University at Buffalo

B.S. in Statistics

Buffalo, NY

August 2020 – December 2023

Relevant Coursework: Regression Analysis, Intro to Linear Algebra, Intro to probability, Statistical Inference, Design of Experiments, Statistical Quality Control

George Mason University

M.S in Data Analytics Engineering

Fairfax, VA

January 2025 – May 2026 (Expected)

GPA: 3.92/4.0

Relevant Coursework: Database Management, Applied Statistics, Metadata Analysis, Big Data Analytics

SKILLS

Technical Languages / Spreadsheets: *Python, R, SAS, SQL, Microsoft Excel, AWS Athena*

Data Visualization: Power BI, Tableau, GGplot2, IBM Cognos

Other skills: Team player, Excellent Communicator, Active Listener, Problem Solver, Easily Adaptable, GitHub

Spoken Language: English (Native), Chinese (Workable)

PROJECTS

Washington D.C. Crime Research- R, Python, AWS Athena (SQL)

- Analyzed crime reports in the Washington D.C. area in 2024. Created many visualizations such as mapping crime, bar plots, scatterplots, etc. Derived insights from raw reports data into actionable data-driven decisions that can be made.

Correlating Social Media Metadata with Stock Volatility: Market Sentiment Analysis- Python, NLP

- This project utilized public data sourced from r/Wallstreetbets in the year 2024. Performed sentiment analysis and financial analysis from public Reddit sentiment compared to Yahoo Finance data to see if there were any trends that correlate public sentiment and stock volatility.

Super Store Dashboarding- Tableau

- Utilized past sales data from 2017-2020 to create an interactive dashboard that actively conveys information about the customer base and total sales/profits of subcategories and sales trends. The dashboard encompasses the entire data and visualizes sales information to easily digestible interactive visualizations for anyone to understand.

Stroke Prediction and Guide- Python, Pandas, Sklearn, Seaborn, plot.ly

- Developed and implemented machine learning models using python to predict stroke occurrences and created a step-by-step guide on what I did. Used visualization techniques to enhance user readability and experience.

CERTIFICATES

- Google Data Analytics Certificate, Coursera
- Google Advanced Data Analytics Certificate, Coursera
- Macquarie University "Excel Skills for Business: Intermediate II" Certificate, Coursera
- IBM Data Analyst Specialization Certificate, Coursera
- Stanford University Machine Learning Specialization Certificate, Coursera
